# WHO WE ARE

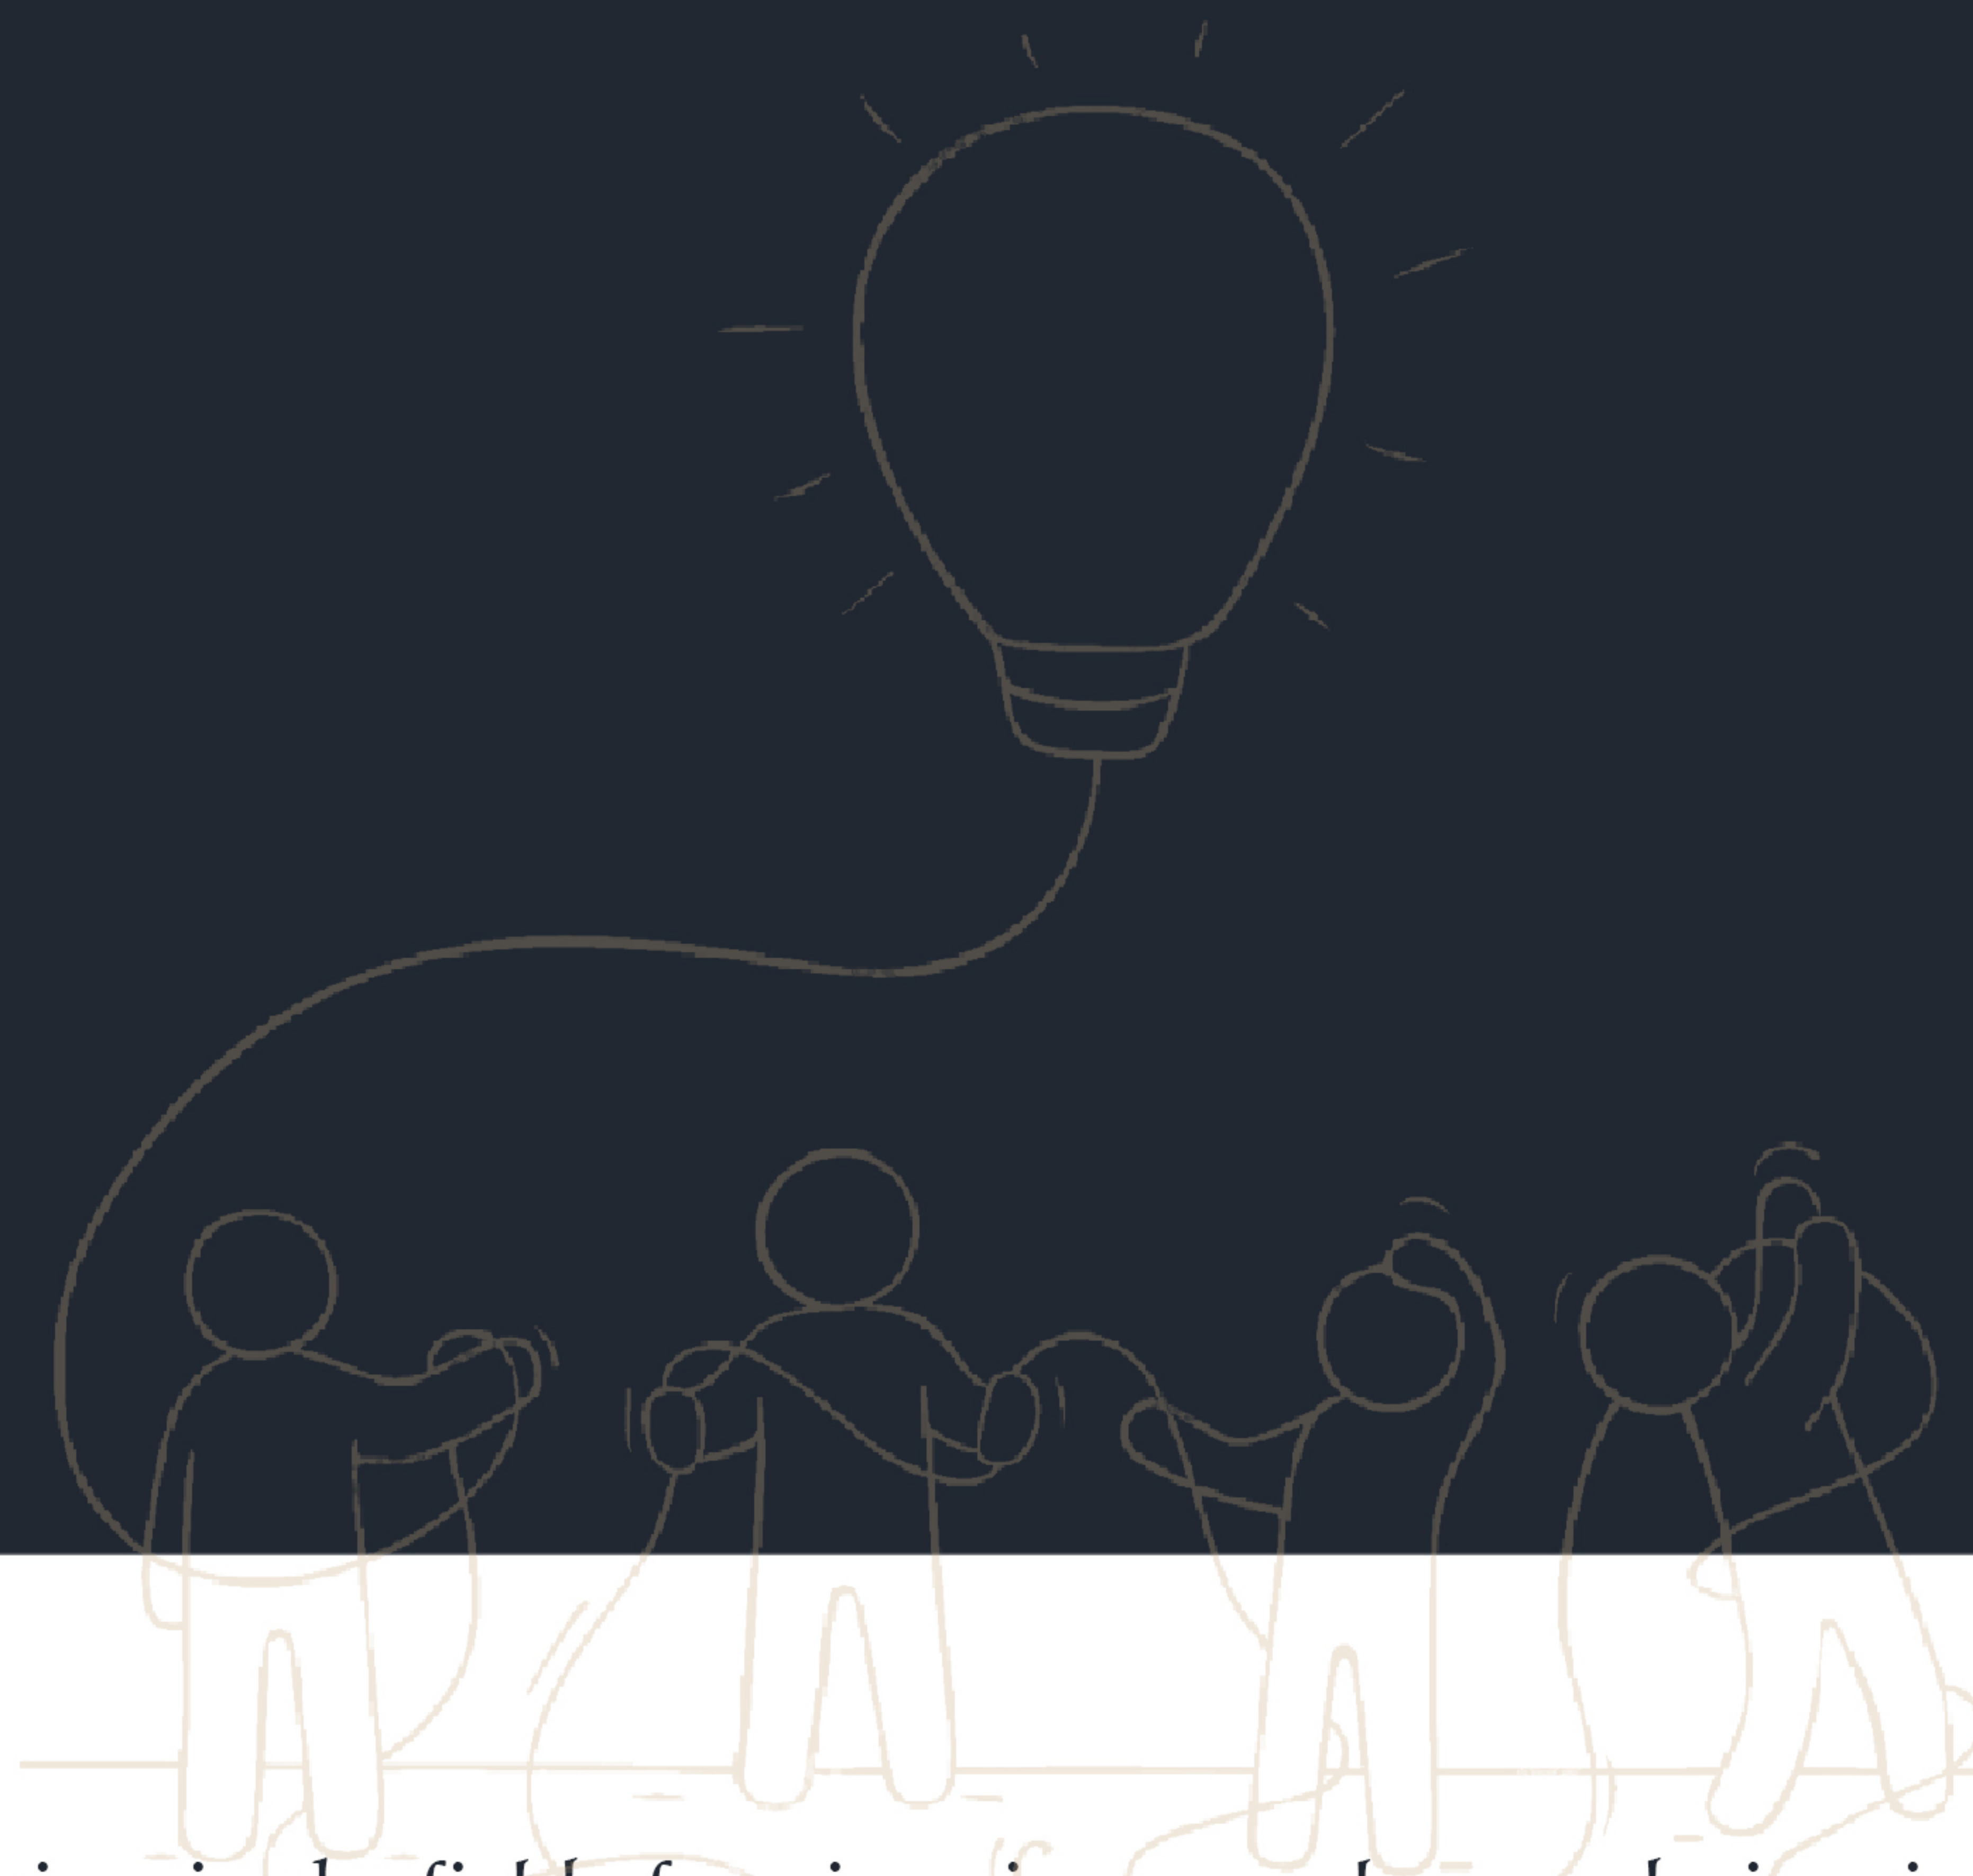

## WHO WE ARE

Engineering consulting office "**DAKKAH**" is a specialized Saudi establishment in the field of engineering consultation established in 2022. It provides all engineering solutions, designs and project management in addition to professional implementation supervision services. Our office depends on a team of highly qualified and experienced engineers to provide a high level of creativity and innovation to ensure our excellence and to gain our client's satisfaction. We aim to create a working space that holds experts, creators and innovators in an inspiring and creative environment. The office offers its services in interior and exterior design, architectural and structural design, MEP design, landscape design and engineering and designing consultancies in addition to land surveying services, project management, and supervising from scratch until delivering the project done based on the clients' needs and requirements.

## OUR VISION

## OUR VISION

We look forward to achieving a leading position in the field of engineering consultancy, design, implementation and supervision of the projects by facing the challenges and variations and using the latest techniques and scientific and practical engineering solutions to cope with the 2030 vision and contribute in the renaissance and comprehensive development of The Kingdom of Saudi Arabia.

# OUR MISSION

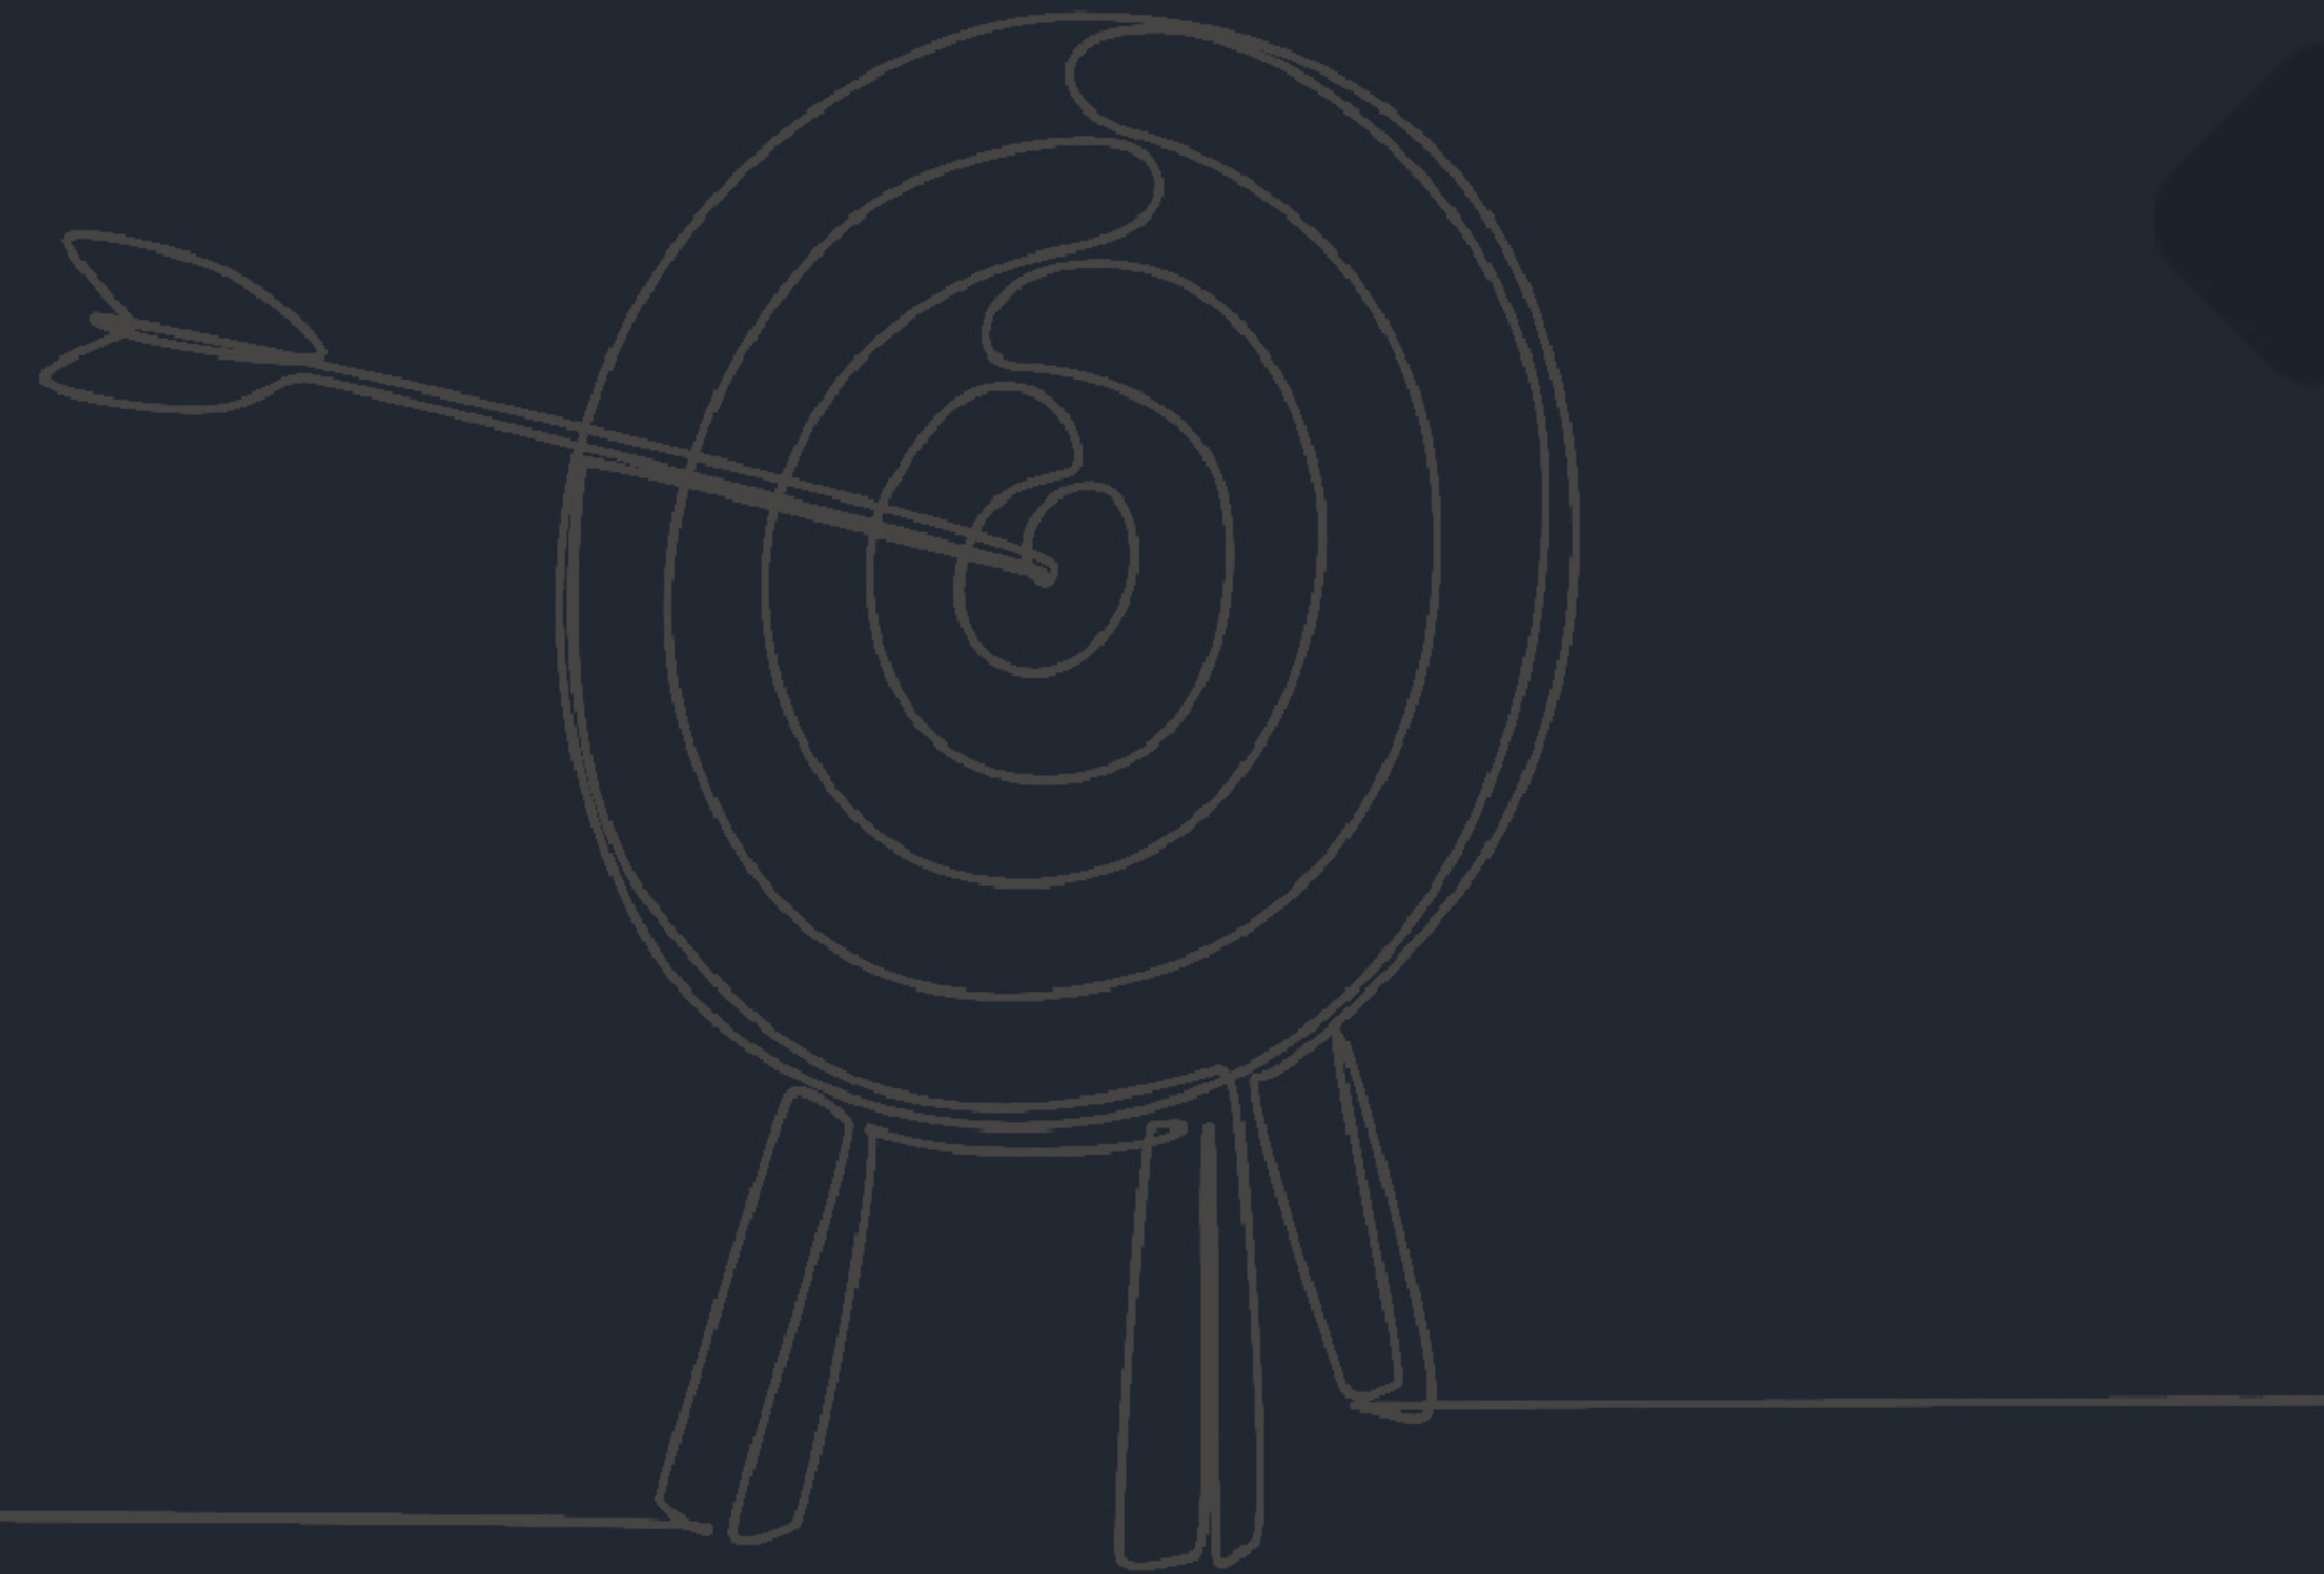

## OUR MISSION

We look forward to launching high-quality and efficient services based on local and global quality standards while creating successful long-term relationships with clients by offering everything special and unique that gets beyond their expectations, To achieve this, we select and attract our team members from among the best talents and those with expertise in various engineering fields.

# OUR GOAL

## OUR GOAL

In light of the rapid changes in various sectors, we aim to find the best solutions for engineering work and offer consultation services that fit a wide range. That will help to achieve the maximum benefit for our clients, being trustworthy, and a leading name in the engineering sector by managing projects with a practical vision that focuses on the details.

# OUR VALUES

## OUR VALUES

- Meet clients' needs and aspirations
- Commitment to honesty and integrity with clients.
- The experience and professionalism of the team.
- Quality assurance of services and works..
- Commitment to all the determined dates.
- Gain the clients' satisfaction as it is our most important priority.

## QUALITY POLICY

### QUALITY POLICY

All our services are subjected to a quality policy with approved standards. We depend on a Quality Management System to establish principles of continuous improvement and work methodically on the system, not on the individuals to guarantee business continuity, implement projects, and reduce time wasting, efforts, and costs.

### SAFETY POLICY

We commit to a strict safety policy to maintain our team by creating a safe work environment. All occupational safety and security standards are applied in the work environment to reduce all accidents at work, with periodic follow-ups to these procedures.
